

MCC AND INSTRUMENT PANEL

Motor Control Centres

Twyver Switchgear have designed, built, installed and commissioned “Motor Control Centres” for numerous industries and customers at both home and abroad.

Recent applications:

- ✓ Quarries
- ✓ Industrial Gas Plants
- ✓ Water / Sewage Treatment Works
- ✓ Automobile manufacture
- ✓ Nuclear Facilities
- ✓ Aviation industry
- ✓ Food Processing

Twyver Switchgear “Motor Control Centres” incorporate

- ✓ Fully compartment Form 1
- ✓ Dimensions tailored to customer requirements
- ✓ Fixed or Withdrawable
- ✓ Any type of starting and stopping
- ✓ Fully weatherproof

Control systems incorporated within the motor control centres are designed to meet with our customers individual process requirements, utilising techniques from basic relay control through to sophisticated PLC systems.

Instrument Panel

Twyver Switchgear have designed, built, installed and commissioned Control Desks and Instrument Panels for numerous industries and customers.

Recent applications include:

- ✓ Quarries
- ✓ Industrial Gas Plants
- ✓ Water Treatment Installations
- ✓ Power Generation
- ✓ Food Processing

Control desks and instrument panels are specifically designed to meet with customer's process requirements and range from complex, full scale, power station simulators to small wall mounted control panels.

The Customers preferred types of Instrumentation and control devices are incorporated within our designs.

Mimic diagrams can be incorporated so that process operators can see the status of their plant at a glance.
